

March 7-9, 2025 • Bucharest, Romania

Ormco Days in Romania Expert Insights on Orthodontic Diagnosis and Treatment

Drs. Andrei Iacob, Bogdan Geamanu,
Elizabeth Menzel, André El Zoghbi

From March 7th to March 9th, renowned experts in the field will provide exclusive insights into their advanced clinical practices. This event brings together a distinguished team of specialists, offering you the opportunity to enhance your treatment planning and improve patient outcomes. By attending, you will benefit from their collective expertise, expanding your knowledge and elevating the quality of care you provide. This is a rare chance to network with peers and learn directly from the foremost leaders in the industry. Each day will offer in-depth perspectives on delivering optimal patient care with precision and excellence.

Date

Day 1: March 7 | Drs. Bogdan Geamanu & Andrei Iacob

Day 2: March 8 | Dr. Elizabeth Menzel

Day 3: March 9 | Dr. André El Zoghbi

Location

JW Marriott Bucharest Grand Hotel
Calea 13 Septembrie 90 050726 Bucharest

Who should attend

This course is designed for orthodontists.

Fee

Doctor - Early bird (till 10th of February)	750 EUR inc. VAT
Doctor - Regular	900 EUR inc. VAT
Post-Graduates	550 EUR inc. VAT

*Registration fee includes lectures and refreshment breaks

**Stay tuned for the social activities

Ormco Days in Romania

Expert Insights on Orthodontic Diagnosis and Treatment

Day 1: March 7

Drs. Bogdan Geamanu & Andrei Iacob

- ▶ The role of diagnosis in orthodontics is to create a treatment plan focused on the patient's problem list and to address the patient's main motivation for seeking orthodontic treatment.
- ▶ Accurate diagnosis is the key to a proper treatment planning and a stable long term result.
- ▶ Getting both excellent occlusion and excellent esthetics can, indeed, be quite difficult, but it's the goal to which we should all strive.
- ▶ To treat only the occlusion solves half of the problem. To treat only for dental esthetics also treats half the patient.
- ▶ By correctly identifying the growth pattern, the skeletal pattern, the initial conditions in three spatial dimensions, as well as the correct analysis of the case from a functional and aesthetic point of view, together with the use of all current digital methods of diagnosis and treatment planning, we will achieve the best results for our patients.
- ▶ An accurate diagnosis and treatment planning are the key to the success of orthodontic treatment.

Day 2: March 8

Dr. Elizabeth Menzel

- ▶ Ultimate control in perfection with Ultima - Special Tips and tricks to implement to enhance our treatments.
- ▶ TMJ Teaser - A session where we will look into asymmetries and how this effect TMJ-Disorders. Diagnosis, classification and Treatment modalities of the different forms of asymmetry
- ▶ Sleep Apnoea Insight
The last session will introduce Sleep apnoea with all the consequences from a Orthodontic aspect.

Day 3: March 9

Dr. André El Zoghbi

The Power of Diagnosis: Personalizing Aligner Mechanics with 3D Technology and Human Expertise.

- ▶ Aligner technology, powered by 3D tools and AI-driven algorithms, has transformed orthodontics by enhancing biomechanics and treatment efficiency. However, achieving truly customized treatment outcomes requires precise diagnosis - both at the micromovement level of individual tooth planning and the macro movement level of overall malocclusions.
- ▶ Join us as we bridge the gap between practical digital tools and the irreplaceable human expertise in diagnosis, empowering orthodontists to harness technology for what the patient deserves best - precise and personalized care.
